Agenda Items

Update on current progress:

- Login page + user creation complete
- Database is complete
- API integration on AniList side is complete; awaiting to integrate with UI
- Home page/settings/list are in progress at the moment
- Show general design and discuss
 - List page has features not listed
 - filter needs:
 - by type (movie, show, anime) checkboxes
 - by name text field
 - by rating 2x (1-10) spinner (one is max, one is min: if max < min → min = max) (separated by a dash)
 - by status (undecided, backlog, watching, completed, dropped) dropdown

Decisions

- Found bug that on create user confirm password doesn't have to match to create user (no error message and no failure)
- Client wants to see visuals ("eye-candy") even if not working fully
