Decisions

- Client is okay with later submission (Jun 18, 2026 2:40 PM)
- Implement auto refresh for list
- Implement loading message for search loading
- Suggestion: Area where we add in list has a lot of blank space, he wants it filled. Also doesn't like the cutoff when list isn't filled (like the empty space under the shows when there's like only 3 shows)
- Instead of open button he wants a double click, or just have the open button closer to the list table
- Client very happy with product
- Client wants minor issues updated that will be updated in maintenance
